

THE VISION

SPONSORED BY THE

Federal Ministry
of Education
and Research

„We automate the PV world“

**First-class solutions and production
technology for factory and manufacturing
automation in the photovoltaic industry**

- in all manufacturing areas of silicon wafer and thin film based technologies
- by integrating of process equipment according to your needs
- by utilizing our vast experience and pursuit of excellence in the automotive branch
- by using our engineers' development expertise for the assembly, handling and testing of special equipment
- by leveraging the full R&D spectrum of research institutions within S-PAC
- by working with you from planning through implementation to support

CONTACT

S-PAC
Saxon Photovoltaic Automation Cluster

Our experts will be happy in to consult with you, to answer any questions you may have, and to help develop customized solutions based on your individual needs.

www.s-pac.de

S-PAC

**Saxon Photovoltaic
Automation Cluster**

**We assist you on your way
to grid parity and beyond.**

THE ALLIANCE

„We automate the PV world“ - with this as our common goal, six companies and four research institutions in the region of Dresden - Chemnitz form the Saxon Photovoltaic Automation Cluster (S-PAC). We assist you on your way to grid parity and beyond.

FACTORY PLANNING

www.aep-energieconsult.de
Contact: Volker Winkler, Phone: +49 365 830 19 55

AEP Energie-Consult GmbH

Design and engineering of industrial production facilities and photovoltaic power plants; Consulting for energy efficiency and the application of renewable energies.

MACHINE AND PLANT CONSTRUCTION

www.sitec-technology.de
Contact: Robert Hillmann; Phone: +49 371 4708 376

SITEC Industrietechnologie GmbH

Development and manufacture of customized laser machines; Technology development for laser scribing; edge insulation, marking incl. traceability interfacing and for metallizing of MWT cells.

www.usk-utz.de
Contact: Dr. Thilo Richter, Phone: +49 3722 6082 170

USK Karl Utz Sondermaschinen GmbH

Turnkey production technology for the automated complete assembly of solar modules using process machinery to customer specification; Automated solutions for cell manufacture; Automation in the area of thin film module production

www.xenon-dresden.de
Contact: Axel Donath, Phone: +49 351 40209 215

XENON Automatisierungstechnik GmbH

That's automation. - Customized production equipment for solar innovations in the area of wafering, cell production and thin film module assembly.

PRODUCTION CONTROL

www.ais-automation.com
Contact: Gottfried Gerlach; Phone +49 351 2166 0

AIS Automation Dresden GmbH

Manufacturing Execution Systems (MES) for factory and manufacturing automation in the photovoltaic and solar industry - for all production areas of silicon wafer and thin film based technologies.

SERVICE AND MAINTENANCE

www.roth-rau.de/ortner
Contact: Dr. Karli Hantzschmann, Phone: +49 351 888 61 23

Roth & Rau - Ortner GmbH

High-class service and support for equipment in photovoltaic and semiconductor industry. Customized automation solutions for leading edge technology production in clean rooms.

RESEARCH INSTITUTIONS

www.csp.fraunhofer.de
Contact: Prof. Dr. Jörg Bagdahn, Phone: +49 345 5589 129

CSP Fraunhofer-Center for Silicon-Photovoltaics

Research in Si-crystallization, thin film technologies, material development, combined with material characterization, failure diagnostics, FEM simulation for module development and reliability assessment.

www.itw-chemnitz.de
Contact: Dietmar Scholze, Phone: +49 371 38 252 0

ITW - institute for innovative technology

Research, development and technical service in mechanical engineering, automation, measurement technology, digital and optical systems for measurement and control, control engineering.

www.iws.fraunhofer.de
Contact: Dr. Ines Dani, Phone: +49 351 83391 3405

Fraunhofer Institute for Material and Beam Technology IWS

Application-oriented research and development in the area of laser and surface technology based on a substantial materials and nano-technology know-how.

www.tu-chemnitz.de/mb/FabrPlan/
Contact: Dr. Jörg Ackermann, Phone: +49 371 531 35 306

Chemnitz University of Technology, IBF, Professorship Factory Planning and Factory Management

Education and research partner for the mechanical and plant engineering business, automotive industry and suppliers; Topics: simulation and visualization, sustainable production et al.
